78 SUPPLIER'S GUIDE

Dear Readers,

we are proud to being able to present our this year's COSMETIC RAW MATERIAL GUIDE with a complete fresh new look. Many leading and innovative companies once again took the opportunity to present themselves in this unique platform with their new and already tried and tested products.

For the first time ever, the participating companies were also able to use our product register to categorize their products. In our new Sustainability Meeting Point section you can now find sustainable and innovative products and technologies.

Our Raw Material Guide is distributed in addition to the regular editions at all important trade fairs and congresses worldwide. Furthermore the Guide is also available on our Website and Social Media.

To learn more about the participating companies click on the logo on the Cover page and you will be forwarded to the homepage of each company.

We wish you inspiring moments searching and reading.

And don't forget to make yourself part of this unique platform next year!

Global solutions provider of fragrances

Bell Flavors & Fragrances EMEA is a leading supplier of flavours, fragrances, botanical extracts and ingredient specialities. The Fragrances Division focuses on contemporary and fascinating fragrances for personal care, household care products and perfume.

Building bridges between art and science, Bell's perfumers and application technologists transform their passion and the awareness of sustainability issues directly into fascinating fragrance creations. The close collaboration between all departments allows Bell to offer products which are both innovative and functional. Customers benefit from Bell's expertise and overall concepts: From creative marketing ideas, fragrance compositions tailored to individual preferences to comprehensive documentation, Bell awakens imagination and offers a full service.

Diversified and operating worldwide, Bell draws on a global network to develop market-oriented product concepts. As part of a global group of companies with strategic production sites and creative centres in Germany, the USA, Canada, Mexico, China, Brazil and Singapore, Bell is up-to-date with regional market demands. Moreover, Bell anticipates worldwide trends very early and implements them for its customers to suit the market needs. 1,500 employees in different countries enable the company to effectively use its intercultural expertise and to create valuable synergies.

Cosmetic specialties for healthy & beautiful skin

Berg+Schmidt has been active in the oleochemical sector for over 60 years and since more than 20 years, Berg+Schmidt supplies various raw materials for cosmetic and personal care applications from one hand.

Our high-tech delivery systems with proven efficacy for lipophilic actives such as bakuchiol, retinol, Q10, glabridin or ceramides, natural and sustainable emulsifiers as well as natural silicone alternatives answer today's consumer and market needs for skin and hair care applications. Further basic raw materials and products like fatty alcohols, fatty acids, fatty acid esters, shea butter and mild, readily biodegradable surfactant complete our portfolio. Our Stern-Technology Center offers a comprehensive technical support and expertise for the different cosmetic application fields to our international partners worldwide.

World-leading manufacturer of Ectoin

bitop is a German manufacturer and expert in the biotechnological production and development of natural stress-protection molecules, the so called Extremolytes. In nature, these molecules protect extremophilic plants and microorganisms from their hostile environments, such as deserts, salt lakes, hot springs, or the arctic ice. Extremolytes are used as multifunctional, highly effective active ingredients in cosmetics and in human and animal health products.

bitop was founded in 1993 as a spin-off from the Faculty of Bioscience at the University of Witten/Herdecke. Today, we are the world-leading manufacturer of Ectoin® natural for the use in cosmetics and medical devices.

bitop's active ingredients are manufactured by a patented, sustainable, state of the art biotechnological process at our production plant in Germany. Our manufacturing meets DIN EN ISO 13485, ensuring high-quality products for our worldwide customers.

Major markets Skin Care, Body Care, Sun Care, Hair Care, Color Cosmetics, Personal Care

Major products Natural, biotechnologically manufactured active ingredients

Global capabilities

Worldwide distribution available in 30+ countries

Products

Ectoin® natural – ultimate protection and repair (INCI: Ectoin)

Ectoin[®] natural is a 100% natural amino acid derivate. The multifunctional active shows outstanding scientifically proven cell protection and skin repairing efficacy. It shields skin from damage caused by stress factors like pollution, UV-radiation, blue light, extreme temperatures, or dryness and supports a healthy skin microbiome. At the same time, the bioactive offers anti-aging and repairing benefits by regenerating damaged, inflamed, and stressed skin.

Ectoin[®] natural was discovered in 1985 as a protective molecule for extremophilic microorganisms thriving in a salt lake in the Egyptian desert.

Claims: Anti-aging, long term hydration and skin barrier repair, blue light and UV-protection, anti-pollution, skin whitening & lightening, anti-inflammatory and soothing, microbiome support.

Ecocert, COSMOS, NATRUE, natural index = 1 (ISO 16128), halal, vegan, China applicable.

Glycoin[®] natural – the cell energizer

(INCI: Glyceryl Glucoside, Aqua (Water))

Glycoin[®] natural is a multifunctional anti-aging and cell-boosting active ingredient. It reactivates the power of youth in tired, stressed, and mature skin by providing an instant hydration effect, increasing skin elasticity, density, and thickness. The natural bioactive stimulates growth factors and accelerates cell renewal of aged skin.

Originally, Glycoin[®] natural is found in salt-tolerant blue-green algae (e. g., Spirulina), and in desert resurrection plants where the Extremolyte protects the plant's structure from damage during its desiccation and reactivates its re-greening after rainfalls.

Claims: Instant hydration, anti-aging and rejuvenation, stimulation of cell renewal and wound healing, whitening & lightening, blue light protection, microbiome support (prebiotic).

Ecocert, COSMOS, NATRUE, natural index = 1 (ISO 16128), halal, vegan, China applicable. ECTOinOIL[®] - the first oil-compatible Ectoin is a 100% natural and multifunctional bioactive. It is specially developed for the use in sustainable and water-free formulas. As the recognized expert for Ectoin, researchers of bitop aimed to make the highly water-soluble molecule Ectoin available for water-free formulations and therefore developed ECTOinOIL®. With this innovative bioactive, formulators can create highly effective and water-smart products with Ectoin with the same efficacy while saving 99.9% of water compared to an emulsion. Furthermore, ECTOinOIL® is produced by means of sustainable manufacturing processes (biofermentation). The combination of water-saving applications and sustainable manufacturing origin makes this active ingredient a true "green ingredient".

Claims: Anti-aging, long term hydration, skin barrier protection and repair, blue light and UV-protection, anti-pollution, skin whitening & lightening, anti-inflammatory and soothing, microbiome support. COSMOS, halal, vegan, China applicable.

28Extremoin® – pollution protection and

skin regeneration (INCI: Ectoin, Hydroxyectoin) 28Extremoin[®] is a natural, multifunctional "urban protection" bioactive especially developed to deal with the challenging environmental conditions for our skin in modern life. Several studies have demonstrated the ability of Extremolytes, especially 28Extremoin[®], to stabilize skin cells, protecting them from the damaging impact of thermal stress (cryoprotection, heat protection). The superior thermal protection efficacy of Hydroxyectoin[®] is completed by the best-studied cell protection properties of Ectoin[®] natural. This combination of two powerful molecules results in the perfect active ingredient to visibly transform dry, scaly, and rough skin into healthy, hydrated, smooth, and supple skin.

Claims: Anti-pollution, cryoprotection,

heat protection, anti-aging.

Ecocert, COSMOS, NATRUE, natural index = 1 (ISO 16128), halal, vegan, China applicable.

Science based raw materials for modern personal care formulations

Evident ingredients GmbH is a supplier of cosmetic specialty raw materials. With the combined experience of international business managers, chemists, cosmetic scientists, supply chain specialists and logistic experts we make sure that customers get best service, availability and prices even in difficult market environments. We have a vast network of partners around the globe that deliver our products in more than 50 countries.

Based in Hamburg, Germany, Evident Ingredients is located in the heart of Europe and at the second biggest harbor of the continent. This setting allows the innovative materials to be shipped around the world quickly and guarantee a seamless supply to our customers.

Our Evicide[®] range contains modern and natural preservatives and antimicrobials while the Evicare[®] series is built up by different segments of functional ingredients.

We offer powerful preservatives, natural antioxidants, thickeners, actives and food grade emulsifiers for all cosmetic applications.

Products

Evicide[®] stands for modern preservation with the help of multifunctional ingredients and widely accepted preservatives for cosmetics. With a range of 25 different products we offer modern and skin friendly preservation for every cosmetic concept.

More than half of the range is approved for the use in certified natural cosmetics.

All our systems are scientifically tested by regular preservative efficacy testing (PET) in cosmetic formulations, a service that we offer to our customers in their projects as well. With our **Evicare**[®] family we offer a portfolio of functional ingredients that contains emulsifiers, antioxidants, thickeners, chelating agents, and different active ingredients like warming agents, hair conditioners or deodorant actives. Nearly all of our products in this range are approved for natural cosmetics.

In our laboratory we not only develop state of the art formulations for our customers but develop new products, too. In the last two years we have launched several new preservative blends and emulsifier blends that are all produced in Germany.

MANUFACTURER

Import Promotion Desk (IPD)

c/o sequa gGmbH, Alexanderstrasse 10, 53111 Bonn, Germany

Contact

Angie Martinez, martinez@importpromotiondesk.de +49 (0) 228 909 0081 0

in https://www.linkedin.com/company/import-promotion-desk

Your partner for sustainable business contacts

If you are an importer of natural ingredients for cosmetics and looking for reliable business partners and high-quality raw material, then Import Promotion Desk (IPD) is the right address for you.

We identify suitable exporters for you in selected developing and emerging countries. This means we save you the tedious effort and high costs of opening up new supply sources. We thoroughly examine all companies and provide you with reliable and evaluated exporters, who meet your requirements, and we mediate direct contacts to them – at no cost at all, of course. And our services are available to all European importers.

We know that product certification is becoming increasingly important for companies in Europe, which is why we give particular attention to this aspect. No matter whether that means ISO standards, organic, Fairtrade certification or even REACH: We also ensure that all trading partners are familiar with the principles of sustainable business management. In addition, to make it easier for you to implement the supply chain law, we make sure that our partner companies have short and transparent supply chains without intermediaries.

The IPD connects with carefully tested suppliers of natural ingredients from Colombia, Côte d'Ivoire, Ecuador, Egypt, Ethiopia, Ghana, Indonesia, Kenya, Madagascar, Morocco, Sri Lanka, Tunisia, Ukraine, Uzbekistan. The range of natural ingredients for cosmetics includes dried herbs, spices & other plant materials, essential oils, plant extracts, vegetable oils & butter and other specialities.

IPD is an initiative of the Federation of German Wholesale, Foreign Trade and Services (BGA) and sequa, the development organisation and partner of German business. It is funded by the German Federal Ministry for Economic Cooperation and Development (BMZ).

Products

Dried herbs, spices & other plant materials

e.g. avocado seed, avocado skin, cardamom, clove, nutmeg, peppermint, vanilla bean

Essential oils

e.g. cajeput, Cananga, cinnamon bark, citronella, clove, ginger, lemongrass, nutmeg, palo santo, patchouli, sandalwood, turmeric, vetiver

Plant extracts

e.g. acai, avocado, cacao, coconut, coffee and coffee cherry, calendula, golden berry, Passion fruit, gambir, ginger, turmeric, cardamon, cinnamon, durian, moringa, pandan

Vegetable oils & butter

e.g. avocado oil, virgin coconut oil, shea butter, marula oil, nigelia sativa oil

Other specialities

e.g. lemongrass distillate, methyl cinnamate, patchouli crystal, eugenol

Dr. Christiane Salzgeber, cs@flavex.com +49 6835 91950

www.flavex.com

One of the world's leading suppliers of CO, extracts

FLAVEX Naturextrakte GmbH is specialized in the production of botanical extracts by using supercritical CO_2 extraction technology. The private and independent company is a pioneer in this field and has been serving the cosmetics, perfumery, food and nutraceutical industries since 1986.

The clean, eco-friendly and gentle extraction technology preserves the full spectrum of sensitive top notes and bioactive substances. Most CO₂ extracts are characterized by high concentration and low dosage effect. They are all natural, have a high stability and a long shelf life. Our wide product range includes a large selection of high-quality vegan botanical extracts. Many of them are certified organic, halal, kosher and COSMOS approved or certified. All extracts are developed, produced and certified at the company headquarters in Rehlingen-Siersburg / Germany near the borders of France and Benelux countries.

The liquid CO₂ extracts are suitable for various applications in cosmetics and perfumery. For example, Rosemary and Sage Antioxidant Extracts can help to stabilize formulations because of their antimicrobial and anti-inflammatory efficacy. Ginger extract with its bioactive and anti-ageing components is suitable for flavoring and perfuming. Carrot and Paprika extracts provide natural colorants for various applications. Besides other valuable fatty oils, Flavex offers different Seabuckthorn extracts from berries, pulp and seed, which contribute to beauty and regeneration from the inside and the outside.

Products

FLAVEX is specialized in the high-pressure extraction of herbs and spices with natural supercritical carbon dioxide as a solvent. Basically we offer the following types of extracts:

CO₂-se (selective) extracts are produced under low pressure and contain the highly volatile components (mono- and sesquiterpenes) from plant material. Their fresh and typical flavor is very close to the plant. They are often used as flavors or fragrances and have a superior quality in comparison to steam distillates. **CO**₂-to (total) extracts are produced under high pressures (up to 550 bar) and contain all CO₂-so-luble lipophilic plant constituents, e.g., essential and fatty oils, carotenoids, lipophilic antioxidants, sterols, tocopherols, other bioactive constituents and waxes.

Our product list is available on our homepage under the following link:

GEKA – leading manufacturer of brushes and applicators for makeup and skincare

We are a leading manufacturer, supplier, and wholesaler of innovative, high-precision beauty application solutions including mascara, lip gloss, concealer, micro brushes, and beauty tools.

With a strong heritage dating back to 1925, we provide a vast range of impressive brushes, applicators, a wide range of beauty accessories as well as complete packaging systems, all of which can be delivered fully finished and ready for sale. Our product portfolio comprises solutions for mascara, eyebrow products, lip gloss, eyeliner, liquid eye shadow, liquid foundation, and concealer, as well as fully finished products. In addition, we design, develop, and source all types of beauty accessories such as cosmetic brushes, powder puffs, sponges, hair products, and massage items.

We have an established global presence and provide our customers with a combination of global reach supported by a local presence for direct and immediate access, feedback, and solutions.

We work with the most iconic names in beauty as well as those launching their first beauty brand. We are the partner both for those looking for turnkey solutions and for those seeking innovation and responsible, honest packaging.

In 2021, we achieved sales of 127 million CHF with close to 800 committed employees around the globe. Since 2021, we are part of medmix, a global leader in high-precision delivery devices.

Products

Complete packaging solutions & applications for:

- Mascara & Eyebrow
- Eyeliner
- Liquid Eyeshadow
- Liquid Concealer & Foundation
- Lip Products
- Accessories
- Hair
- Skin Care
- Nail Polish

Ready to go

GEKA has a vast stock catalogue with endless combinations possibilities for color cosmetics packaging with short lead times and no investment required.

Customized solutions

GEKA can cater for exclusive customer developments with maximum individuality for unique solutions that set new trends in the cosmetics market.

www.geka-world.com

GEKA ACCESSORIES

Our broad product range encompasses bags, powder puffs, and sponges as well as selected body accessories and hair care products right through to wellness and massage products. All have one thing in common: they unfailingly meet or surpass the high standards of our customers.

A medmix Brand

GEKA

MICRO BRISTLES

Advantages of GEKA Micro Bristle applicators (MBA)

- Soft micro bristles allow for precise, hygienic and soft product application
- Exact matching of the applicator to the application
- Product and customer requirements
- Higher dosage and application precision
- Pure pharma-grade plastic
- No use of glues, fibers, metal or additives
- Reduce product waste

Advanced bioengineering to create more sustainable materials

We are accelerating the world's transformation to sustainable materials by replacing fossil fuel sources with plants. We believe that all products should be responsibly sourced, traceable and transparent – the sustainable source.

Products

Brontide natural butylene glycol is a multifunctional ingredient used in a variety of personal care products and cosmetics

Most butylene glycol products on the market today are sourced from petroleum and are made from acetaldehyde, a carcinogen and mutagen.

Unlike conventional production methods, our process starts with renewable plant sugars. An elegant, one-

step fermentation process converts renewable sugars into a high purity, natural butylene glycol.

We've brought science and nature together to give you a petroleum-free alternative for formulating natural, more sustainable personal care products and cosmetics.

Global. Sustainable. Innovative.

Norevo is an established and globally operating family business that specializes on trading and processing natural raw ingredients. For more than 120 years, we have been sourcing our sustainably produced goods from all over the world: such as honey from Mexico, gum acacia from Africa, licorice from the Middle East, or waxes from Brazil, Asia and Africa.

It has always been our top priority to cooperate fairly and in partnership with our raw ingredient producers – in many cases, this holds true for generations. Thanks to our locations all over the world, we are regionally anchored and interconnected.

This is the only way to ensure that our raw ingredients are of top quality from their very origin and produced in an environmentally sustainable manner. These strong partnerships provide us – and you – with a stable global supply chain. As a responsible company, we view certifications,

sustainable procurement channels, transparent supply chains, and complete compliance all around the world as a key task – and happily and voluntarily go beyond existing standards to this end.

Your specialist for natural waxes and hydrogenated oils

We source our waxes and oils from all over the world. We place great value on the complete traceability back to their origin. Our close and cooperative partnerships with local producers allow us to ensure the sustainable and consistent quality of our raw ingredients on site.

We have our products certified according to various standards, offer diverse organic qualities and products, and fulfill even the most stringent processing requirements for a wide range of industries. In addition, we support our partners in the regions of origin, e.g., with the "Initiative for Responsible Carnauba" in northeast Brazil or multiple sustainability projects in Africa.

Your partner company to drive innovation in the Health & Personal Care markets

ROELMI HPC strongly focuses its activity on researching, designing, and producing high technological functional and active ingredients to reach the highest performing results in final formulas by offering the ethical and responsible choice for sustainable innovations. As a pioneer of sustainability-driven innovations, ROELMI HPC strictly adopts an approach directed to environmental preservation, towards the biodiversity safeguard and the use of renewable sources, driven by innovation in the green chemistry and by the will of building perfect models of circular economy.Thanks to its long experience, ROELMI HPC deals with the market by a scientific method based on recognized quality, passion, targeted research and tested solutions. All these drivers create the backbone for the market development and are promoted by the paradigms of our NIP[®] (Nature Is People) program.

The Empowerment of Ecosytem

In this context, ROELMI HPC announces a brand-new approach to ingredients development, "The Empowerment of the ecosystem". Conceived to solemnize the importance of an ethereal beauty by focusing on the inclusivity and uniqueness of the individuals, it allows the development of active and functional compounds that respect the microbiome and the environment to achieve the well-being of the entire ecosystem, from the skin to the planet's harmony.

ROELMI HPC simplifies the formulator's work with an industrial offer characterized by high performance, both for tailor made and on specific requests. Each product has a complete dossier including safety, efficacy and regulations information.

www.roelmihpc.com https://natureispeople.com

Thanks to the team of collaborators with different and complementary skills, ROELMI HPC is able to answer the questions of personalization of ingredients studied on different application models. The composition and shape of tailor made products are designed and manufactured following specific phases such as R&D laboratory tests, pilot tests and production.

Products

The portfolio is developed through two main technologies: Biotech & Nature. The first one, Biotech, has been created by fine-tuning the standard fermentation process. In fact, the know-how about bacteria and the common steps of the technologies, brought to cutting-edge ingredients and multiple applications. The safety aspects of fermentation and the standardization of ingredients purity continue being of high quality, assuring innovative performances and bringing the maximum of life creation into cosmetics. Microbiota-friendly compounds represent here the inner innovation for years. The first step is linked to the innovation in Hyaluronans, that means the invention of Full-spectrum Hyaluronans (HATech 2.0®) where the focus is not on a specific molecular weight, but rather on the efficacy of a range of fractions working in synergy, just as naturally happens in our body. In addition, an osmolyte has been developed to rebalance the skin environment after exposure to external stresses like air pollution or salty/chlorinated water. Subsequently, a probiotic-derived ingredient has been conceived, capable of strengthening the skin barrier. As a last step in the R&D, the company launches a new cellular energizer.

The second one, the Natural technology, includes soft methodologies whose first aim is nature's respect, followed by the recreation of nature within active and functional ingredients (emollients, texturizers, emulsifiers and surfactants). The integrity of the vegetal origin comes first, followed by the integrality of plant compound inside ROELMI HPC ingredients. The real innovation of the products lies in the plant hidden inside them. The use of soft technologies like solvent-free techniques, physical steps (pressure, temperature, or mechanic action) do not alter natural molecules. We focus on biological efficacy, going beyond chemical composition. Circular economy models are adopted to create cosmetic values from non-edible fractions Bio-

create cosmetic values from non-edible fractions. Biology completes chemistry: Nature's active systems are based on synergic ranges of compounds, rather than the purity of a single active element.

To get your company listed here, contact claudia.oderwald@eurocosmetics.de

Efficient and pleasurable ingredients for the beauty of everyone

By your side throughout the world, Seppic imagines and develops ingredients for Active Beauty (proven efficacy & attractive concepts) and for Sensorial Beauty (unique performances & creative textures), that provide cosmetic products and consumers with performance and emotions. As a passionate beauty and skincare expert, we offer unique ingredients, derived from the very best of our technology, and combine them with inspiring concepts in order to give our customers a leg up. In line with Seppic Corporate Social Responsibility, our vision is to help everyone enjoy a healthy life in a healthy environment:

Caring for our People by enabling everyone to work safely and in good health, promoting well-being and personal development;

caring for the Environment by continuously reducing the environmental footprint of our activities, particularly with regard to climate and biodiversity;

caring for all our Stakeholders by engaging and listening to our stakeholders, particularly our suppliers and customers, in order to move forward together throughout the supply chain.

Products

Our Research & Innovation teams strive to design innovative solutions, relying on our 4 technology pillars: Polymer science, Plant-based chemistry, Botanical extraction and Marine biotechnologies.

The richness of Seppic unique ingredients portfolio makes it possible to address multiple cosmetic categories, such as skin care and hair care, but also make-up and sun care. Our product portfolio includes:

- Active ingredients for skin care and hair care
- Polymeric Thickeners & Stabilizers
- Emulsifiers
- Sensory Ingredients
- Foaming agents

Building on our skincare solutions and our nutricosmetics ingredients, we aim to pioneer the "Inside & Out" beauty concept. At the crossroads of the nutraceuticals and cosmetics industries, it provides beauty benefits through oral and topical applications.

For Seppic, mastering the formulation of its customers' finished products is a source of innovation for maximizing the effectiveness of its ingredients, offering unique sensory signatures and proposing new formulation or gesture concepts. With its Customer Technical Service Centers in France, the United States, Brazil, China and India, as well as its marketing and sales teams around the world, Seppic offers to its customers a support tailored to their local needs: personalized training, formulation advice, and technical assistance.

Company Profile

VAV Lipids Pvt Ltd, established in 2003, is an innovation driven company with focus to provide solutions in the field of Pharmaceutical, Nutraceutical, Cosmeceuticals & drug delivery markets with specialization in "Lecithins and Phospholipids". VAV produces these ingredients from plant, animal & synthetic sources & are backed by the highest level of scientific data, technical quality and safety to meet the growing demand of the market.

VAV's manufacturing facility in Ratnagiri is built as per cGMP standards, manned by technically-qualified scientists who guarantee that each process is governed by rigorous quality control standards. VAV Lipids is committed to produce high-quality products with minimal damage to the environment. Our production facilities are built on zero discharge policy. The highly advanced, well-equipped phospholipids production and R&D facility is designed to support product development and product research at its facilities.

Market & Applications

Admired across the International Phospholipids market, VAV's reach is spread all around the world, with 75% being Europe, the rest being spread around the world. VAV's ingredients find its applications across the pharmaceutical, nutrition & personal care industry.

Highlights

- Approval of Personal care products to COSMOS standards.
- Clean, green and sustainable manufacturing processes with zero-discharge facility thus minimizing the impact on the environment.
- Identical quality, production and regulatory standards across segments, applications & geographies.
- Diverse & innovative applications (Liposomal delivery, Micellar activity, Lipolysis).
- We provide our customers start to end technical support with complete hand holding.

Products

VAV offers LECIVA (plant based lecithins), LIPOVA (animal based lecithins) and OLEOVA (egg yolk oil).

LECIVA-IMMIX and LECIVA-IMMIX M Emulsification of cosmetic preparations, frizz control and conditioning agent for hair

LECIVA-IMMIX+ and LECIVA-IMMIX M+ Emulsification of cleansing/washing products, Frizz control agent in shampoos

LECIVA-SMAP*

Emulsification of highly aqueous cosmetic preparations, Precursor for micelle formation of hydrophobic actives, Humectant in moisturizing skin care preparations.

LECIVA-ACE*and LECIVA-AUBADE*

Emulsification of high fat loaded cosmetics

LECIVA-DIFUZ*

High purity liposome precursor, Lipolytic agent in topical preparations

LECIVA-DIFUZ M, LECIVA-DIFUZ M+, LECIVA-LITHE M

High Purity Liposome Precursor

LECIVA-DIFUZ +

High Purity Liposome Precursor, Lipolytic agent in topicals

LECIVA-LITHE*

High Purity Liposome Precursor, Lipolytic injectables

CHOLESTEROL

Maintains stability and structural integrity of liposomes, Humectant and permeation enhancer.

LECIVA-MICELLA Precursor for micelle formation of hydrophobic actives.

LECIVA-DIFUZ H High purity Liposome precursor

LECIVA-DIFUZ O

Soluble Phospholipids for lipidic and hydrophilic formulations.

OLEOVA

Humectant, emollient, anti-oxidant, anti-acne, anti-scar agent

LIPOVA-E200

Protein substitute and additive in hair care preparations to impart strength and shine.

* Marked ingredients are COSMOS approved. Other grades available on request.

Berjé Inc. 700 Blair Rd, Carteret, NJ 07008, USA

Contact Berje@berjeinc.com +1 9737488980

https://www.berjeinc.com/

Global sourcing leader of essential oils and aromatic chemicals

Berjé Inc. is a family-owned business that has been in operation for over seven decades and three generations. The company was founded in 1949 by two brothers, Alexander and Julius "Les" Bleimann, whose creative approach utilizing art, science, and a passion for ingredients from around the world set the stage for Berjé to become a leading supplier of the flavor and fragrance industry. From this foundation, Kim Bleimann was able to grow Berjé into a multinational portfolio of brands known as the "Berjé Group," housing over 300 essential oils and 3000 aromatic chemicals. With the Whole Herb Company headquartered in Sonoma, California and Berjé Trakia based in Bulgaria, Berjé now maintains a presence in over 75 countries, working side-by-side with traditional growing communities to produce some of the finest essential oils and raw botanicals in the world. From their origins as a humble office space in lower Manhattan to their current cutting-edge facility in Carteret, New Jersey, Berjé remains the family-owned industry leader like no other.

Key Global Capabilities

Berjé's company headquarters, raw materials repository, and manufacturing operations are located in central New Jersey, with satellite warehousing facilities in Chicago and Los Angeles. We house over 3,000 aromatic chemicals and virtually every commercially-available essential oil, making our inventory one of the largest in the industry by-far. We maximize our inventory to minimize your wait. Such vast and rapidly growing supply assures availability for both an increasing U.S. market, as well as a vibrant export trade, shipping worldwide to over 70 countries.

Berjé is a global sourcing leader with supply lines running on six continents. Our raw material capabilities are centered on the rapid delivery of essential oils and aromatic chemicals, supported by our longstanding relationships with a global network of established and emerging producers. This ensures the greatest possible potential for uninterrupted supply, even within unpredictable markets.

In 2003, Berjé Trakia was formed in Plovdiv, Bulgaria to source and manufacture some of the highest quality natural essential oils in the world. Located deep within Bulgaria's Rose Valley, this location was recently revamped in 2020, enhancing the production of rose oil and lavender oil within the region. This helps Berjé guarantee consistent supply of these delicate essential oils without compromising on quality. In 2009, Berjé also partnered with the Whole Herb Company based in Sonoma, California. Whole Herb specializes in providing access to the finest herbs, spices, botanicals, nutraceuticals, and cosmeceuticals on the market. All of these branches come together to form the Berjé Group, helping us to stay connected throughout the world of flavor and fragrance.

GloryActives – Your partner for cosmetic active ingredients

In modern cosmetics, active ingredients are the essential basis for the success of cosmetic products. In an environment, which is affected by growing expectations on the performance of cosmetic formulas, it becomes more and more important for cosmetic producers to work with the best available and innovative actives.

Our active ingredients and private label products make sure that the formulas of our customers fulfil what modern cosmetics are able to accomplish.

Our product portfolio includes a broad spectrum of actives for all fields of cosmetics, including natural cosmetics. Actives from plant extracts based on knowledge of centuries about their applications and the power of sustainable microalgae products to synthetic peptides and highly innovative dermal delivery systems – we offer the perfect active for each formula. Our actives are ideal tools for cosmetic producers to realise the best possible protection and care of the skin. We are also happy to fulfil customised active developments and additionally offer face masks and eye pads as private label products.

With our interdisciplinary team with more than 20 years of experience in the cosmetics industry and scientific expertise, we consult our customers individually from the product idea, conception, active marketing to claiming and efficacy studies.

In our own active line Glorydermal[®] we also offer active developments from our research projects. Within the umbrella concept PROTECTIVE BEAUTY the Glorydermal[®] line covers different actives to protect the beauty of the skin. Our new active is Glorydermal[®] GUARD for holistic skin protection from the major aging factors UV radiation and free radicals. It is based on the enzymatic activity and efficiency of a synergistic complex containing the repair enzyme photolyase and an antioxidant enzyme to provide a long-lasting effect.

We want your customers to feel beautiful and comfortable in their skin.

Global. Sustainable. Innovative.

Norevo is an established and globally operating family business that specializes on trading and processing natural raw ingredients. For more than 120 years, we have been sourcing our sustainably produced goods from all over the world: such as honey from Mexico, gum acacia from Africa, licorice from the Middle East, or waxes from Brazil, Asia and Africa.

It has always been our top priority to cooperate fairly and in partnership with our raw ingredient producers – in many cases, this holds true for generations. Thanks to our locations all over the world, we are regionally anchored and interconnected.

This is the only way to ensure that our raw ingredients are of top quality from their very origin and produced in an environmentally sustainable manner. These strong partnerships provide us – and you – with a stable global supply chain. As a responsible company, we view certifications,

sustainable procurement channels, transparent supply chains, and complete compliance all around the world as a key task – and happily and voluntarily go beyond existing standards to this end.

Your specialist for natural waxes and hydrogenated oils

We source our waxes and oils from all over the world. We place great value on the complete traceability back to their origin. Our close and cooperative partnerships with local producers allow us to ensure the sustainable and consistent quality of our raw ingredients on site.

We have our products certified according to various standards, offer diverse organic qualities and products, and fulfill even the most stringent processing requirements for a wide range of industries. In addition, we support our partners in the regions of origin, e.g., with the "Initiative for Responsible Carnauba" in northeast Brazil or multiple sustainability projects in Africa.

Attractive and innovative active ingredients from well-known manufacturers

Founded in 1993, ProTec Ingredia GmbH is a privately owned company based in Bergisch Gladbach near the city of Cologne.

We take pride in distributing active ingredients from our internationally renowned partners in the territories of Germany, Austria, Switzerland and the Netherlands.

Distributing in this context means more than taking in orders and shipping goods timely from our warehouse to the customer; first and foremost it means service and performance, ideas and reliability in a highly competitive environment.

Our services comprise the regular issue of newsletters on new products, concepts and technologies, trend presentations, the development of marketing concepts either on our own or in co-operation with our customers, the permanent supply of technical, regulatory and commercial support along with our advanced ingredients, just to name a few.

ProTec Ingredia GmbH serves customers in the Personal Care industry. These range from manufacturers of high-end prestige products to producers of mass market preparations and include numerous companies active in the field of contract development and contract manufacturing.

For many years, ProTec Ingredia has carried ingredients in its portfolio that respond ideally to the demands of the cosmetics industry, even in the ever more challenging regulatory environment. The product portfolio comprises active ingredients for the use in skin care and hair care, sun care preparations and decorative cosmetics. All of them are backed up with extensive technical and scientific documentation to provide optimum claim support. Many of the actives supplied by us have won innovation prizes for their technical or conceptual advancement allowing cosmetic manufacturers to launch formulations that generate new trends and gain maximum public response.

Products

We supply highly advanced active ingredients for numerous applications:

- Skin Regeneration
- Hydration / Barrier Support
- Anti-Wrinkle & Lifting
- Antioxidative & Energizing
- Impure & Oily Skin
- Skin Defense & Resilience
- Whitening & Brightening

Radiance

- Mattifying
- Reactive & Sensitive Skin
- Firming & Plumping
- Sun Care & Photo-Aging
- · Anti-Pollution & Detoxifying
- Soothing & Well-Being
- Body Shaping & Anti-Cellulite
- Hair Care & Scalp Care

Comprehensive services and unmatched expertise

With more than 61,000 staff in over 59 countries, Eurofins is an international network of independent life sciences companies operating 940 laboratories. Eurofins companies offer a broad range of services such as product testing, laboratory analyses, training courses, and consultancy. Our customers include raw materials suppliers, manufacturers, retailers, and consumer protection organisations.

Hamburg-based Eurofins Consumer Product Testing (CPT) GmbH specialises in testing items that will come directly into contact with consumers. This includes consumer products such as cosmetics and cosmetic packaging, hygiene and paper products, and laundry, care and cleaning products.

Our team of experts provides comprehensive, cost effective, and practical testing services. We can perform specific tests to cater to your needs, upon request. The analytical results are judged according to their compliance with the relevant legal requirements (national, European, and international), as well as recommendations from relevant authorities, such as the BfR (German Federal Institute for Risk Assessment) or NGO standards (Ökotest, Stiftung Warentest).

We can rely on the broad analytical portfolio of Eurofins companies worldwide which offer services such as chemical and usability testing, microbiology, and clinical and consumer research studies. Our ISO 17025 accreditation demonstrates that we provide precise, reliable test results. This is confirmed by our constant, successful participation in round robin tests.

Products

Eurofins Consumer Product Testing GmbH offers the following services for skin, hair, and decorative cosmetic products:

- Chemical & Physical Analyses
- Microbiological Tests
- Tolerance and Sensitisation Tests
- Efficacy Tests
- Sensory Tests
- · Clinical, Application, and Consumer Studies
- Stability Tests
- Cosmetic Packaging
- Regulatory Affairs

Following the "opinion" published by the Scientific Committee on Consumer Safety (SCCS) in 2012 on fragrance allergens in cosmetic products, the European Commission will issue a new regulation at the end of 2022 to introduce mandatory labelling regarding the new allergens identified in the SCCS' opinion.

The DIN EN ISO 16274 standard on methods for analysing allergens provides an overview of the 57 allergens mentioned in the SCCS' opinion with GC-MSD analysis (Methods for analysis of allergens – Quantification of suspected fragrance allergens in consumer products – GC analysis of ready-to-inject sample).

Eurofins Consumer Product Testing GmbH can detect any fragrance allergens in your products and ensure that they comply with European Committee for Standardisation (CEN), thereby providing an Europe-wide comparability of your products.

CALLAGHAN CONSULTING INTERNATIONAL COSMETIC GLAMS DEVELOPMENT & SCIENTIFIC AFFAIRS

https://www.ccintl.eu

in https://www.linkedin.com/in/tmcallaghan/

Callaghan Consulting International is a leading European based consultancy that helps ingredient suppliers, brands, and cosmetic businesses, build and develop strategies for a sound body of product claims evidence, and help them manage and comply with the 6 EU regulatory product claims criteria and legislation:

STRATEGY: We develop and help grow ingredient suppliers, and brands providing both strategic consultancy and hands-on practical project management.

COLLABORATION: We work collaboratively with our clients, becoming part of your "team".

GUIDANCE: We guide and support you, providing useful contacts, education, and knowledge to help you succeed in the fast moving world of cosmetics.

CREATION: We help clients create opportunities and accomplish their goals based on 5 core areas of excellence.

We operate in 5 core areas of excellence: Skin Complexities, Claims Development, Trouble-Shooting for Claims, Bespoke Workshops & Education, Communications & Author

From cosmetic researchers to copy writers, we help them translate complex basic scientific research developments, and other research findings, including technology transfer opportunities, into marketing and consumer understandable applications without the loss of scientific integrity.

A biochemist, with more than 35 years in skin research and cosmetic science, Dr. Callaghan has served in key R&D roles for a number of international companies across Europe. Remaining in the EU and based in Germany, she established Callaghan Consulting International (CCI), in 2008. CCI is a leading specialist consultancy, dedicated to ingredient suppliers as well as brands, pursuing discipline and scientific advancements involved in the cosmetic claims development process.

As a scientist and the author of the popular book "Help! I'm Covered in Adjectives: Cosmetic Claims & The Consumer", she is also very widely published. Giving regular workshops and presentations internationally, she is a major contributor for peer-reviewed and trade journals, as well as authoring behalf of clients internationally. In addition she has appeared in number of press articles and reviews.

Dr. Callaghan also sits on the scientific editorial board of the International Journal of Cosmetic Science, and is an active member of a number of professional societies including the Society of Cosmetic Scientists and the British Herbal Medical Association.

She is also an advisor to TKS Science Publisher (Italy), and writes the monthly Claims Insights column for EuroCosmetics2go (Germany). She is also lecturer at the University of Sunderland's (UK) MSc Cosmetic Science course.

Independent consultancy company in the area of sun protection

Sun Protection Facilitator GmbH was founded 2018 by Uli Osterwalder, as an independent consultancy company in the area of sun protection. It is based on my knowledge and 20+ years of experience in sun protection in the fabric care and personal care industry, while working for the big global UV filter supplier companies Ciba/BASF and DSM.

Short CV

Uli Osterwalder is a trained Chemical Engineer (ETH Zurich, Switzerland and UH Houston, Texas). He joined central process development of Ciba-Geigy in Basel, where he first developed a Phosgene Generator. Later he developed his leadership skills in Project Management and Process Analytics. At Ciba Specialty Chemicals Uli Osterwalder helped establish new business development in Fabric Care and Personal Care. At BASF SE in Ludwigshafen and Duesseldorf he became Senior Marketing Manager and Scientific Adviser in Sun Care. Back in Basel he worked for DSM as senior Scientific Adviser suncare for two years.

2018 he started the consulting company, Sun Protection Facilitator GmbH. He continues his commitment to contribute to further improvements in sun protection. Uli Osterwalder works for ISO on the development of new UV protection assessment methods and is currently chairing the technical committee ISO TC/217 (Cosmetics). He is author and co-author of numerous scientific articles and editor of the series of papers CHALLENGES IN SUN PRO-TECTION, Karger, Basel.

Consulting Services

- Sunscreen Market (Trends & Innovations of Sunscreens and UV Filters)
- Understanding Sunscreens
- Sunscreen Design and Innovation
- SPF Testing (in-vivo, in-vitro, in-silico)
- General talks and courses
- Specialized seminars
- Projects
- Challenging sessions
- Trouble shooting

SUSTAINABILITY MEETING POINT

Berg+Schmidt GmbH & Co. KG

Kristin Köhler, cosmetics@berg-schmidt.com +49 40 284 09 580 www.berg-schmidt.com

By redesigning products, reconsidering a product's lice-cycle and by focusing on what nature has already given to us, we can reduce sourced materials to a real minimum. Some ideas are as good as simple which also applies for new formulation concepts. Efficient formulations with pleasant textures and sensory can be both – natural and minimalistic.

One result of this approach is our natural thickening and emulsifying fibercompound BergaMuls ET 1 (INCI: beta-glucan and pectin) giving the answer to today's trends of circular beauty.

evident ingredients GmbH

Fernando Ibarra, fernando@evident-ingredients.com +49 40 468 964 777 www.evident-ingredients.com

Most of our product range is approved for certified natural cosmetics and based on renewable sources. We are member of RSPO and Ecovadis and strive to minimise our environmental impact by developing environmentally sound products that help our customers to save materials and energy in their production.

FLAVEX Naturextrakte GmbH

Dr. Christiane Salzgeber, cs@flavex.com +49 6835 91950 www.flavex.com

Flavex offers high-grade CO_2 extracts from a wide range of herbs and spices in conventional and certified organic quality.

Biodegradability and Plastic Packaging

More than ever, consumers are demanding transparency regarding the potential environmental damage caused by the products they use. Manufacturers are facing questions about the impact that raw materials, packaging, and production processes have on the planet. Increasing amounts of plastic waste as well as public discussion about microplastics have prompted the development of alternative methods and materials. Eurofins Environment Testing laboratories offer a wide range of analytical services that measure the environmental impact of cosmetic products, from raw materials to the final product including packaging.

Biodegradability refers to the ability of a certain material to be broken down over time by the activity of microorganisms. Analytical testing laboratories can examine the biodegradability of substances and products in accordance with international standards, such as the OECD and ISO. According to the OECD, a distinction is made between ready biodegradability and inherent (potential) biodegradability. Biodegradability tests are of high importance for the cosmetics industry with regard to raw materials as well as the end products. Likewise, biodegradability is a criterion in REACH Regulation (EC) No. 1907/2006, the Regulation on Detergents (EC) No. 648/2004, the EU Directive on the reduction of the impact of certain plastic products on the environment, and the OECD Guidelines for Labelling, such as for the European Ecolabel.

Our services

- Determination of the Ready Biodegradability of Substances and Products according to OECD Standard 301 (A-F) under Aerobic Conditions
- Testing Inherent Biodegradability

Plastic packaging is widely used for cosmetic products for branding and identification purposes, to convey product information, and to prolong the shelf life of cosmetic products. The European legal requirements regarding plastic packaging are listed in the European Cosmetic Regulation (EU) No. 1223/2009 (Article 17), the European Framework Regulation (EC) No. 1935/2004, and the European Plastics Regulation (EU) No. 10/2011.

Eurofins Consumer Product Testing GmbH evaluates all the components of your packaging design. Based on our findings, we develop customised test protocols to evaluate packaging compliance with legal and customer-specific requirements.

Migration Modelling, worst-case-calculations as well as overall and specific migration testing are critical in order to secure a Certificate of Compliance. The advisory document dealing with the 'Information Exchange on Cosmetic Packaging Materials along the Value Chain in the Context of the EU Cosmetics Regulation EC 1223/2009' published by Cosmetics Europe is always taken into account.

GEKA GmbH

Stefanie Gunz, Stefanie.Gunz@geka-world.com/ +49 9822 87 300 Lea Bogenreuther, Lea.Bogenreuther@geka-world.com +49 9822 87 476 www.geka-world.com

Sustainable cosmetics packaging by GEKA

GEKA is committed to sustainability – in production processes and employee management as well as at product level. We offer truthful, reliable, and responsible packaging solutions for your cosmetics and beauty products – down to the smallest piece, whether it's the fiber of a mascara or a transparent cradle to gate CO_2 footprint analysis of our products.

Recycled packaging & sustainable cosmetics packaging for beauty & cosmetics

Caps & bottles

We are able to offer eco-friendly caps molded from 100% PCR-PP material and bottles molded from 100% PCR-PET material.

Applicators

We provide flocked applicators for lip and face treatments with a minimum of 25% recycled flock material or completely non-flocked applicators to reduce material usage to a minimum.

Brush

Our exclusive sustainable brushes for mascara are made of bio-based fiber consisting of 100% renewable raw materials.

Wiper

We provide wipers made of LLDPE material with a bio-based content of at least of 84%, derived from sugar cane.

Thread parts

We provide thread parts made of 66% PCR-PBT or made of 100 % bio-based materials delivered from the renewable castor oil plant.

GEKA Sustainability Report

In June 2022, GEKA released its first Sustainability report, outlining the commitment to and progress towards the company's sustainability goals. The reduction of the carbon footprint of its global value chain is one of the key targets discussed in the report – with the medmix objective of achieving a 30% reduction compared to 2019, in addition to securing at least "B" ranking from CDP. On this target, GEKA has already secured a B ranking from CDP and has decreased overall carbon footprint by 13.2% compared to 2019. It is on track to achieve the 30% reduction target objective by 2025.

Genomatica

Eric Alvarez, ealvarez@genomatica.com +33 785289751 www.brontidebg.com

Our fermentation process reduces global warming potential by 50% compared to petroleumbased butylene glycol production process.

We're conscious of the environmental impact we make, from the farmland growing our sugar feedstock to the water used in our purification process.

To substantiate the sustainability story, we carried out a life cycle assessment (ISO:14040:2006) to quantify our environmental impact compared to petroleum-based butylene glycol that was peer-reviewed by an independent panel.

GloryActives GmbH

Dr. Sandra Christian, dr.s.christian@gloryactives.de +49 4158 209469 www.gloryactives.de

Import Promotion Desk (IPD)

Angie Martinez, martinez@importpromotiondesk.de +49 (0) 228 909 0081 0 https://www.importpromotiondesk.de/en/

IPD arranges contact with evaluated exporters. We take into account factors such as product quality, exportability, export capacity and compliance with international standards and certifications. Compliance with internationally recognised social and environmental standards is particularly important to us. That is why we train our partners intensively in the area of corporate social responsibility (CSR).

IPD companies offer a wide portfolio of environmentally friendly products, such as:

Palo Santo fruit oil from Ecuador, extracted from the Palo Santo fruit and not from wood! Palo Santo fruit essential oil is a conscientious alternative to Palo Santo essential oil steam distilled from wood. The fruit can be sustainably collected without harming the living trees.

Ethiopian essential oils whose natural ingredients are sourced directly from the forest areas in the heart of Ethiopia's biosphere reserves. It preserved function, property and nutrients.

Furthermore, essential oils from Indonesia, produced by SMETA certified companies are part of the product range of IPD suppliers.

Norevo GmbH

Annabell Becker, contact.waxes@norevo.de +49 40 53 79 79 0 www.norevo.de

Candelilla Wax

Exlusive COSMOS-certified

As a partner of the manufacturer Multiceras, we exclusively distribute Candelilla wax that complies with the high organic and natural cosmetics standard COSMOS-certified throughout the EU. Norevo sources Candelilla wax exclusively from producers who strictly adhere to the CITES Convention. Moreover, our suppliers are committed to complying with the guidelines of the Ethical Trading Initiative and the UN Global Compact.

Bioethical Carnauba Standard

We import 100% Carnauba wax from Brazil which is compliant with the "Bioethical Carnauba" seal. Alongside our local partners, we are committed to improving the living standards of workers and their families.

Another important and decisive issue is the traceability of wax right to the harvest fields.

ProTec Ingredia GmbH

mail@protec-ingredia.de +49 2204 86898-0 www.protec-ingredia.de

Sustainability and eco-consciousness are not primarily related to single ingredients, but to the strategic decisions of the parties involved along the value chain. Here are some product groups exemplifying the decision for sustainability:

PhytoCellTec Products: Actives made from plant stem cells obtained biotechnologically; no land needed for biomass production, very little water consumption, no fertilizers or pesticides

EPS Products: Exopolysaccharides from marine planctonic microorganisms; Blue Biotechnology with almost no impact on natural resources

Extracts from rare plants grown in local greenhouses to protect their existence in nature

Upcycling actives made from leftover raw materials of other industries

Extracts from algae grown in photobioreactors; no collection in the wild

Extracts from seaweeds cultivated in dedicated and protected areas; no sea harvesting, cultivation and harvesting entirely by hand

Provital Siham Bouhrir, marketing@weareprovital.com +34 937 19 23 50 www.weareprovital.com

We capture the essence of the Earth while respecting the environment. We work with selected suppliers in an effort to establish direct contracts with local farmers. This allows us to ensure a fair, secure and traceable supply chain.

Seppic

We are building the future through innovation and evolution. We aim to protect the value of Nature and People in product manufacturing. We care about the environmental impact of our productions by adopting eco-sustainable processes and renewable raw materials. We aim both to keep high quality standards and efficacies.

CeraFluid: dermo-mimetic fluid Ceramide NP vehicled in a non-edible lipidic matrix CytoFruit[®] Waters BIO99: biologically active waters from upcycled Mediterranean fruits Olifeel[®]: esters from non-edible olive fractions

Celus-Bi[®] Feel: biodegradable alternative to microplastics in rinse-off applications EMotion[®] Esters: biodegradable esters from Mediterranean crops

Seppic

seppic.cosmetic@airliquide.com +33 1 42 91 40 00 www.seppic.com/en/beauty-care

Our eco-friendly O/W emulsifiers MONTANOV[™] range are designed to minimize their environmental impact and be close to brand engagements and consumer commitments. They are from renewable vegetable origin with a 100% renewable origin carbon. Answering to the requirements of several green labels, they are developed and manufactured according to the Green Chemistry 12 pillars.

The manufacturing process has been optimized for a CO_2 emission reduction and the residual biomass is recycled through methanization to obtain these range of carbon conscious ingredients.

HYDRACHRYSUM[™] (Aqua/Water - Glycerin - Helichrysum stoechas Callus Culture Lysate) is an innovative moisturizer from undifferentiated plant cells lysate of Helichrysum stoechas and is obtained from a patented eco-designed technology Celtosome[™]. On one hand, this technology avoids the need for a cultivation surface and the harvest of the plant, as the dedifferentiated cells are cultivated in bioreactors from only a small piece of the plant (seed, leaf, etc).

On the other hand, the technology also respects the main pillars of green chemistry, using mild conditions of temperature, pressure and agitation and water as a solvent. In addition, the eco-designed approach of the process is reinforced by producing a lysate of the cultivated cells. Often freeze-dried, here, the cells undergo a lysis step. In this way, it saves energy but also reduces the quantity of waste by using the culture medium and offering an unique molecular richness.

SACI-CFPA German branch

Info-germany@saci-cfpa.com +49 (0)211 457 0511 https://www.saci-cfpa.com/

U-FERMENT® OIL SERIES from UNITED ACTIVE INC.

Range of oils obtained by a fermentation patented process, which extracts the molecules present in medicinal herbs with greater efficiency. This process creates bio-surfactants in the oil that reduce surface tension, thus optimizing the penetration of active ingredients through the skin barrier for greater effectiveness. Metabolites produced during fermentation decrease hydrophobic interaction by lowering the molecular force between each triglyceride, making them more flexible. It allows better spreadability, lighter texture and deeper absorption than those of unfermented oil.

GREENDIOL® from GS CALTEX

Natural humectant 100% bio-based with a superior skin moisturizing effect compared to 1,3-Butylene Glycol. Boosts the antibacterial activity and helps active ingredients to stay stable. Light texture and high skin penetration.

AMIN LG95U from GUANGZHOU TINCI MATERIALS TECHNOLOGY CO., LTD.

Extremely mild amino acid powder surfactant with excellent foaming properties and good biodegradation. It reduces irritation and residue from anionic surfactants and provides a silky, moisturized feel. Excellent resistance to hard water.

AMIN LG NA RSPO MB from GUANGZHOU TINCI MATERIALS TECHNOLOGY CO., LTD.

Extremely mild amino acid surfactant with good foaming power. Helps reduce irritation and residue from anionic agents such as SLS and fatty acid soaps. Provides a silky, moisturizing after-feeling.

NXT SOLV RANGE from NXT LEVVEL BIOCHEM BV

NXTLEVVEL bio-solvents offer outstanding benefits for personal care formulations, whilst addressing the needs of environmentally conscious consumers and adding value for brand owners. NXT SOLV are proprietary ketal ester solvents derived from plant feedstocks (corncobs and bagasse). Biodegradable clear liquids with a low odor profile. Sustainable replacement for several cosmetic ingredients including Dimethicones.

Almost all of our CO_2 extracts are suitable for use in body care applications such as oils, soaps, deodorants and other cosmetic products.

In addition to fatty oils such as Amaranth Seed or Rosehip Seed extract, we also offer coloring and scenting extracts from a variety of plants.

Functionally effective extracts such as Rosemary and Sage Antixidant extracts are also included in our portfolio.

SMILE BRIGHT WITH SABINSA' S ORAL CARE INGREDIENTS

Good oral health is important for all aspects of life. Mouth is the entry point to your digestive and respiratory tracts and thus keeping the mouth disease free is highly critical for preventing the pathogenic bacteria from entering the body. Oral health has implication in diabetes, cardiovascular diseases osteoporosis and several other health conditions

Oral hygiene can be maintained by good oral health care, such as daily brushing and flossing.

Supplements with antioxidant and anti-inflammatory activities provide good support for maintaining oral health

EFFECTIVE AGAINST PERIODONTITIS AND HEALTHY INFLAMMATORY SUPPORT
